Create a Node.JS Application which serves a static website.

Server.js file:

```
const express = require('express');

const app = express();

const port = 3000;

// Serve static files from the "public" folder

app.use(express.static('public'));

// Start the server

app.listen(port, () => {

  console.log(`Example app listening on port ${port}`);

});
```

`public/index.html:`

```
<!DOCTYPE html>

<html>

<head>

  <title>My Static Site</title>

  <link rel="stylesheet" href="style.css">

</head>

<body>

  <h1>Hello from Static Website!</h1>

  <p>This is served by a Node.js server using Express.</p>

  <script src="script.js"></script>

</body>

</html>
```

Hello from Static Website!

This is served by a Node.js server using Express.
